Pontus Everhed

CEO, Forming Function Stockholm AB

We accomplish this by:

- In a life-cycle perspective, review the products we buy or have manufactured and to prevent any use of unallowable substances.
- Prevent pollution of air, soil and water by choosing transporters with better vehicles and with better fuel. Forming Function shall also contribute to less use of energy by choosing origin-marked electricity produced by renewable energy sources, and recycle or re-use as much as possible of the waste that are produced within our business.
- Environmental work is seen as a long term investment. Through education and information, all employees will understand the environmental impacts of their actions in their own work.
- Established environmental management program are realised by continuous improvement.
- Comply with the requirements of the standard EN ISO14001: 2015, laws and regulations

The environmental policy shall be available to anyone who wants to take part of it.
